

Senior Tester

Would you like to work for an innovative and exciting Company?

We are My Possible Self and we have launched a revolutionary mental health application onto the App Store and Google Play. The app is a first of its kind and has research-backed, clinically proven content to reduce stress, anxiety and mild to moderate depression in just eight weeks. Reporting to the Senior Software Architect, we are looking for a hard-working and enthusiastic individual to join our team at this very exciting time.

How your skills and passion will come to life at My Possible Self

- You are a true Senior Tester with strong knowledge and skills of all aspects of running a test team.
- You will have an understanding of how applications should work.
- You will collaborate with the wider My Possible Self team.
- You love feedback and will look to continually improve test processes.

What you've accomplished

- You have 5+ years of experience working as a Senior Tester
- You have been involved in the creation of multiple iOS, Android and web applications
- You have a proven ability to work with all members of a development team to improve software quality.

- You are an excellent communicator, and have experience managing other testers.
- As a primary user of our applications, you are able to provide feedback with the overall user journey and experience.
- You are self-motivated, hard working, and work well against deadlines.

Skills

5+ Years experience as a Senior Tester

Duties will include but are not restricted to the following:

- Responsible for the testing team completing test projects on time and of expected quality
- Responsible for ensuring the Test Team follow correct practices and processes
- Mentor other members of the testing team where testing guidance is required
- Responsible for ensuring the Testing Team follow the correct processes and practices
- Through Training and guidance possess the confidence to lead the team

Testing duties include:

- Test Planning
 - Able to plan own workload, scope/requirements
 - Design and own the test plan/sprint & work with others to complete the tasks assigned to the team.
 - Design and agree test scenarios/user stories, coordinating with key stakeholders.
 - Identify issues/risks relating to sprint/project and provide suggested mitigating actions, raising these as early as possible.
- Test Preparation
 - Review user stories and product backlog during sprints.
 - Lead the readiness into test execution by reviewing the user stories/test scripts, input test data and expected results for all test phases with developers and scrum master (as and when required).
 - Carry out regular test script/scenario reviews in preparation for test cases execution
 - Ability to map test case/scripts to test requirements and then actual business requirements.
- Test Execution
 - Manage and execute test scenarios and ensure the detection of as many defects as possible in each sprint.
 - Review defects logged and carry out the necessary steps in order to resolve them and report on progress.
 - Devise improvements for current procedures
 - Assist/participate in lessons learnt sessions with clients (as and when required).

What you will be doing

You'll be heading up our test department, working alongside the development team to create world-leading mental healthcare software.

As a key-player within our agile team, you will attend sprint-planning, requirements gathering, stand-up, and all other key meetings that are part of our development process.

How to get started

If you're excited by the idea of seeing yourself in this role at My Possible Self, please apply with your CV and a cover letter that best expresses your interest and unique qualifications.
